EDUCATION

- Bachelor of Technology in Computer Science and Engineering (AI/ML)** 2023 - 2026
KIT's College of Engineering, Kolhapur (Autonomous) CGPA: 9
- Diploma in Computer Engineering** 2020 - 2023
Dr. D.Y. Patil Polytechnic, Kolhapur Percentage: 87.09
- Secondary School Certificate (SSC)** 2020
Maharashtra High School and Junior High School, Kolhapur Percentage: 92.20

EXPERIENCE

- Qualitas Techno Solutions** 2022
Intern Kolhapur
 - Authored a technical report on 51+ emerging IoT technologies, influencing the company's choice of two new prototyping platforms.
 - Improved prototype functionality by 20% through resolving hardware-software integration issues
- Zerovaega Technology Pvt ltd.** 2026
Intern Kolhapur
 - Designing and implementing front-end and back-end features is the responsibility of a Full Stack Developer.
 - Created database schemas, created REST APIs for Postman testing, developed responsive user interfaces, and oversaw Git-based code integration.

PROJECTS

- Smart City Solutions: Automatic Garbage Tracking System**
An IoT-based automated system
 - Built end-to-end IoT system using Arduino and GPS to reduce operational costs and fuel consumption through route optimization.
- Surveillance: Real-Time Insight System**
Object detection project
 - Cut manual monitoring needs by 60% by developing a Python surveillance system with real-time SMS alerts and activity logs.
 - Achieved a 95% accuracy rate in person detection and tracking by optimizing a high-fidelity, real-time algorithm.
- Real-Time Signal Adaption for Multi-Directional Heavy Traffic**
An object detection project
 - Designed a highly scalable system prepared for citywide deployment and integration with existing smart city infrastructure.
- JanPath – Winning Elections with Precision Analytics**
Data Engineering, Analytics, Backend and API
 - Created JanPath, a precision analytics-based Election Management System with AI-powered automation, real-time data pipelines, and predictive insights. Data-driven and performance-optimized full-stack solution that is scalable.
 - Role-based dashboards and intelligent chatbot and role-based dashboards can help with campaign decision-making.
- Textify**
React.js, JavaScript (ES6)
 - Created Textify, a web application that is responsive and uses React.js to analyze and change text in real time.
 - Implemented client-side functions such as dynamic UI changes, word and character counts, and text formatting.
 - Used Bootstrap, state management, and component-based design to guarantee responsiveness and speed.
- TalentBridge – Recruitment System**
Angular 21, TypeScript, Node.js, Sequelize ORM
 - The goal of this project is to develop a professional networking online application that is conceptually similar to LinkedIn but has been simplified for initial deployment. Users will be able to establish profiles, highlight their academic background and talents, upload resumes, and view other users' profiles.

SKILLS

- **Programming Languages** - C, C++, Java, Python
- **AI/ML and Data Science** - YOLOv8, CNN ,TensorFlow, OpenCV, Pandas, NumPy, Matplotlib, Scikit-learn
- **Web Development and Databases** - HTML, CSS, JavaScript, Node.js, React, Angular, NodeJs,Flask, PostgreSQL, MySql, MongoDB
- **IoT/Embedded** - Arduino, Hardware-software integration
- **Generative AI** - Transformers, Prompt Engineering, Fine-tuning , GANs, Synthetic Data Generation
- **Other Tools-** Tableau, PowerBI, Processwire

ACHIEVEMENTS AND AWARDS

- | | |
|---|------|
| • Finalist - SHODH-2022 at JSPM, Pune National Level Project Competition | 2022 |
| • Winner - Project Based Learning Competition | 2024 |
| • Runner-up - Project presentation competition. | 2024 |

CERTIFICATIONS

- **Google (AI/ML)** - Completed a Google-certified course covering the principles of machine learning, model construction, assessment, and real-world AI applications.
- **MotionCut (Java Frontend)** - Demonstrated practical experience in Java-based frontend development and UI implementation.
- **1Stop (Java Full Stack)** - Demonstrated hands-on skills in building full-stack applications using Java with integrated frontend, backend, and databases.
